

Abstract

An adhesive sheet composed of a mixture of two thermoplastics T1 and T2, wherein

- a) the adhesive system has a softening temperature of greater than 65°C and less than
5 125°C,
- b) a storage modulus G' at 23°C, as measured by test method A, of greater than 10^7 Pas,
- c) a loss modulus G" at 23°C, as measured by test method A, of greater than 10^6 Pas,
- d) and a crossover, as measured by test method A, of less than 125°C.
